NGN Solutions DOO

29 Noemvri 13/7

1000 Skopje

Macedonia

NGN Solutions was founded in 2008 in Skopje, Macedonia ,by a team of specialists in the field of Telecommunication and Networking.Our company is based on partnership, owners value each other and believe they can make a difference. With the products and services from our portfolio we can always bring you a solution that works well both for you and your customers.

Our Mission

Creating customer tailored, intelligent Network Solutions. Showing the companies how networks can make their business easy, more efficient and profitable.

Our Vision

NGN Solutions is dedicated to providing communication solutions for customers by integrating innovative and leading edge technologies and in the same time delivering knowledge and expertise by offering consulting, planning and engineering. Our company is young and adaptable, in touch with the latest technologies. NGN Solutions respect customers, by being ready to offer them convergent next generation network design - one network that delivers all services.

Company Values

Complex and challenging projects require – both on the providerr's and on the customersr' side – teams of outstanding specialists with many years of professional experience. The cooperation is enriching for everyone involved, and we believe that it also keeps pushing the limits of “what is possible” further ahead – closer to our common success.

- **Expertise and Know-how**

We use know-how that we have gathered through many years of our experience. We greatly encourage innovative thinking and systematically process all new ideas and suggestions of our staff to make sure our work is always high above the usual standard and our goals are achieved more effectively.

- **High Quality Solutions and Services**

In order to deliver solutions and services of excellent quality, we carefully listen to our customers' needs and expectations. We continuously monitor latest trends in ICT and use them in our work. We highly value responsibility of every individual for doing things well, effectively and on time.

- **Professional Approach**

Just like on our customers' side challenging tasks attract the best people, we always provide our clients with professionals that rank among the best in their field and perceive every obstacle as a new opportunity for further professional growth.

Our partners

AudioCodes Ltd. enables the new voice infrastructure by providing innovative, reliable and cost-effective Voice over Packet technology and Voice Network products to OEMs, network equipment providers and system integrators. AudioCodes provides its customers and partners with a diverse range of flexible, comprehensive media gateway, server and processing technologies, based on VolPerfect™ - AudioCodes' underlying, best-of-breed, core media gateway architecture.

Juniper Networks remains uniquely positioned to maintain industry leadership based on our core competencies in architecture, silicon design, and the industry's only carrier-class, purpose-built "pure IP" modular network operating system Junos. Juniper offers a broad product portfolio, spanning routing, switching, security, application acceleration, identity policy and control, and management designed to give customers unmatched performance, greater choice and flexibility while reducing overall total cost of ownership.

2N TELEKOMUNIKACE a.s. joint-stock company is a well-known European producer and supplier of telecommunication technologies. Well equipped with experience, high-skilled staff and know-how, 2N has always been able to keep up with the latest and up-to-date technologies and innovations in the world of telecommunications.

VocalTec leveraging a unique combination of cutting-edge technologies and interoperable solutions, VocalTec maintains a solid track record of successful deployments worldwide. VocalTec has played a central role in the implementation and support of dozens of advanced telecom solutions, specializing in the smooth migration of voice networks from TDM to IP. Partnering with prominent system integrators and equipment manufacturers, VocalTec serves an installed base of leading carriers. VocalTec's best-of-breed solutions handle call control, routing, media processing, signaling and security within state-of-the-art NGN networks. Successfully anticipating industry trends and needs for over a decade, VocalTec helps service providers achieve a sustainable competitive advantage.
