snom solutions

the snom business telephone solution.

INCREASE PRODUCTIVITY. *Reduce costs.*

ONE SYSTEM.

Benefit from the snom business telephone solution.

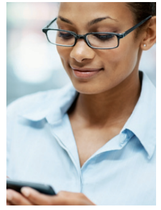
The **snom** business solution has been created to make your life easier.

Let's face it; you've already got enough to do already just running your business:

Why make things even more complicated by trying to piece together a telephone system?

Fortunately, the **snom** business solution range is built to the highest levels of operating simplicity whilst providing improved call handling, significant call cost savings and the ability to streamline communications between sites, remote offices and home-workers. Compatibility, interoperability and comprehensive system security combined with a user-friendly experience form the **snom** "Made in Gemany" hallmark of a high-end cost-effective system of quality and reliability.

The system is easy to install and implement for effective internet telephony backed by standard telephone network connectivity guaranteeing availability whilst reducing operational costs.



ALL FEATURES.

Guaranteed to meet your needs.

Features, features, features.
The **snom** business solution deployment is simple and you won't need to sacrifice features and functionality for your mission-critical business applications:

A secure end-to-end system enabling advanced transparently packaged telephony for change without compromise and no hidden add-on surprises.

NO LIMITS.

How far do you want to go?

The **snom** business solution is flexible and scalable.

From a single person start-up through to a globally networked corporation, you will find that the **snom** business solution is able to meet your needs and grow as you grow. Regardless of the scale of your business, the **snom** solution will ensure that you achieve your aims of increasing productivity and reducing costs.

flexible and scalable

ONE SYSTEM.

No headaches.

Stay secure

Protect your business with the secure **snom** business solution which utilizes the strictest security protocols and features to prevent your communications being compromised

Location freedom

Mobile and home-working solutions let you attract the best people without them disappearing from view. Employees will be more productive and better connected improving your business efficiency

Multi-site

Business communications will work across all sites – informal call centers work as a single cohesive unit, operators and supervisors can monitor and assist a dispersed virtual team for greater productivity

A system that can grow

snom's building block approach to converged communications allows you to start with a single site and grow the system with your business, protecting your investment whilst growing to meet increased demand

Control costs

Install and manage remote sites without leaving your office, implement centralized cost tracking, security alerts and billing – reduce the total cost of ownership

Versatility

Fully comprehensive network connectivity, including: analog lines, ISDN or IP (SIP) trunks as a stand-alone system or transparently networked across several locations

ALL FEATURES.

Full control.

The **snom** business solution gives you full control over your communications. Features such as address book integration, multiple call redirection events and destinations, and day and night mode put a multitude of functions at your fingertips. Advanced functionality allows you to dynamically meet business communication challenges head on, with any number of scenarios easily managed with auto attendants for incoming call management, hunt groups to guarantee that a crucial sales call is never missed and secure conference rooms for the next global strategy conference call meeting.

EASY TO SET UP.

Easy to use.

The complete spectrum of extension management features such as multiple extension names and hot desking for use by guests and visitors; through to call screening and presence monitoring and much more; give your business the edge when it comes to communications management and efficiency. The web-based interface means that system management, set up and provisioning is as easy as 1,2,3; allowing you to administer your communications so that they match your specific business requirements.

THE SNOM IP TELEPHONE SYSTEM.

Designed to meet your needs

The **snom** IP telephone system is available in three versions; each designed to meet the full spectrum of business requirements and to help you to effectively counter all of your communications challenges.

snom SOHO SOLUTION

Unleash your entrepreneurial ideas on the world by harnessing your communications with the **snom** solution for small office/home office edition. With **snom ONE** at its core, the solution is the perfect way to ensure that your start-up is not missing out on the SIP trunking party and complete access to all of the advantages, features and functions of an IP telephone system.

- Up to 10 extensions
- Mobile extensions
- Remote worker support
- Centralized address book
- Hot desking
- Voicemail
- Completely interoperable with all **snom** phones and devices

snom BUSINESS SOLUTION

Improve the productivity and efficiency of your business by increasing the availability of your team and implementing advanced communications architecture. The feature rich, end-to-end **snom** business IP telephone solution has the functionality to cover the full spectrum of business voice communications scenarios and will maximize your potential whilst cutting costs.

- Up to 150 extensions
- Full system security
- Full system redundancy via standard telephone network (PSTN)

snom ENTERPRISE SOLUTION

The **snom** enterprise solution utilizes the comprehensive unified communications functionality of our partners Microsoft's® and ESTOS solutions to provide large scale enterprises and corporations with a complete communications system: snom devices are compatible with both of these partner's unified communications solutions whilst remaining as fully functional and interoperable devices in their own right. This means that not only can you take full advantage of all the rich presence, video conferencing and communications management strengths of unified communications, but you can also sleep easy in the knowledge that if you decide to switch to a different enterprise-level solution in the future, you will not need to ditch the phones.

- Unlimited extensions
- Rich presence
- Interoperable with all open standard unified communications environments
- Complete future-proof investment

Address book integration
